

# Deep learning

## Introduction

Hamid Beigy

Sharif University of Technology

October 10, 2025

1. Course Information

2. Introduction

3. Success stories

4. Outline of course

5. References

## Course Information

---

1. Course name : Deep learning
2. The objective of deep learning is moving Machine Learning closer to one of its original goals: Artificial Intelligence.
3. Instructor : Hamid Beigy      Email : [beigy@sharif.edu](mailto:beigy@sharif.edu)
4. Class : CE 201
5. Virtual class link: <https://vc.sharif.edu/beigy>
6. Course Website: <http://sharif.edu/~beigy/14041-40719.html>
7. Lectures: Sat-Mon (10:30-12:30)
8. Teaching Assistant : Reza Tavakoli      Email: [seyedreza.shiyade@gmail.com](mailto:seyedreza.shiyade@gmail.com)

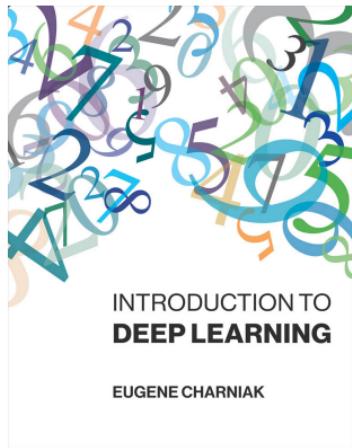

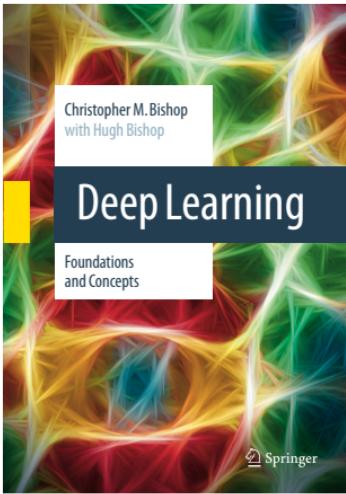

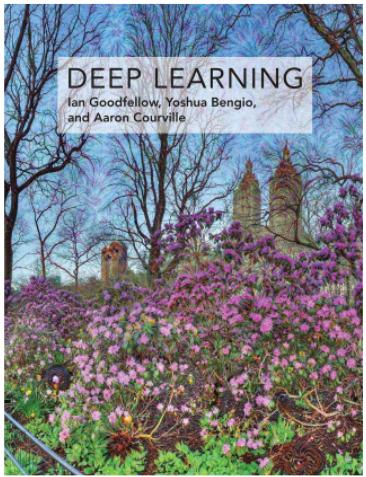

- Evaluation:

Mid-term exam	25%
Final exam	25%
Practical Assignments	30%
Quiz	15%
Paper	5%

1404-09-10

Hard deadline for selection

1. IEEE Trans on Pattern Analysis and Machine Intelligence
2. Journal of Machine Learning Research
3. Pattern Recognition
4. Machine Learning
5. Neural Networks
6. Neural Computation
7. Neurocomputing
8. IEEE Trans. on Neural Networks and Learning Systems
9. Annals of Statistics
10. Journal of the American Statistical Association
11. Pattern Recognition Letters
12. Artificial Intelligence
13. Data Mining and Knowledge Discovery
14. IEEE Transaction on Cybernetics (SMC-B)

15. IEEE Transaction on Knowledge and Data Engineering
16. Knowledge and Information Systems

1. Neural Information Processing Systems (NIPS)
2. International Conference on Learning Representations (ICLR)
3. International Conference on Machine Learning (ICML)
4. European Conference on Machine Learning (ECML)
5. Asian Conference on Machine Learning (ACML)
6. Conference on Learning Theory (COLT)
7. Algorithmic Learning Theory (ALT)
8. Conference on Uncertainty in Artificial Intelligence (UAI)
9. Practice of Knowledge Discovery in Databases (PKDD)
10. International Joint Conference on Artificial Intelligence (IJCAI)
11. IEEE International Conference on Data Mining series (ICDM)

## 1. Packages:

- Keras <https://keras.io>
- TensorFlow <http://www.tensorflow.org/>
- Caffe <http://caffe.berkeleyvision.org>
- PyTorch <https://pytorch.org>

## 2. Datasets:

- UCI Machine Learning Repository <http://archive.ics.uci.edu/ml/>
- MNIST: handwritten digits <http://yann.lecun.com/exdb/mnist/>
- 20 newsgroups <http://qwone.com/~jason/20Newsgroups/>

## **Introduction**

---

Deep learning has various closely related definitions or high-level descriptions.

## Definition (Deep learning)

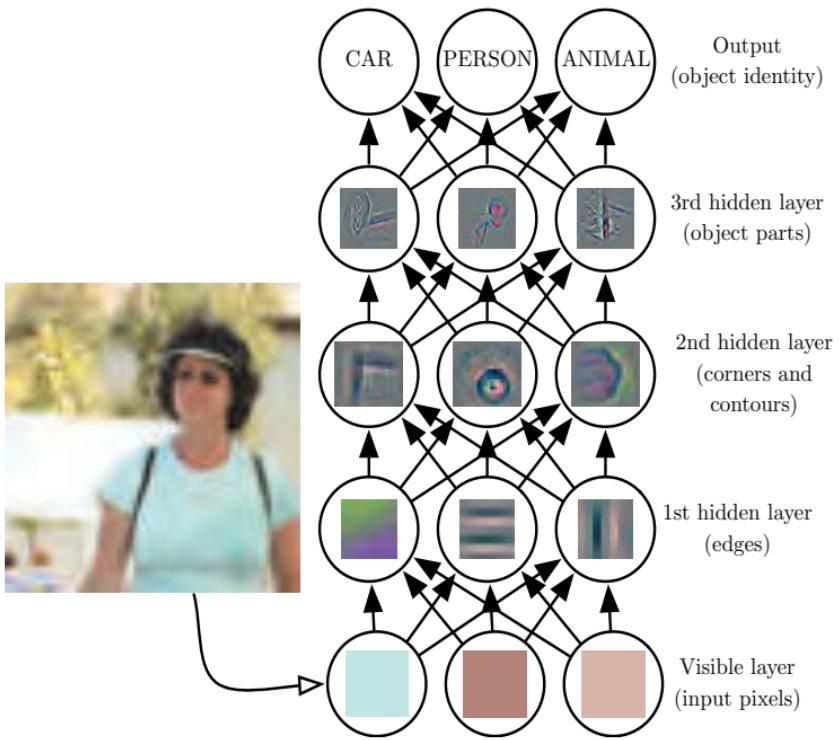

A sub-field of machine learning that is based on

- learning several levels of representations, corresponding to a hierarchy of features or factors or concepts,
- where
  - higher-level concepts are defined from lower-level ones, and
  - the same lower-level concepts can help to define many higher-level concepts.

## Definition (Deep learning)

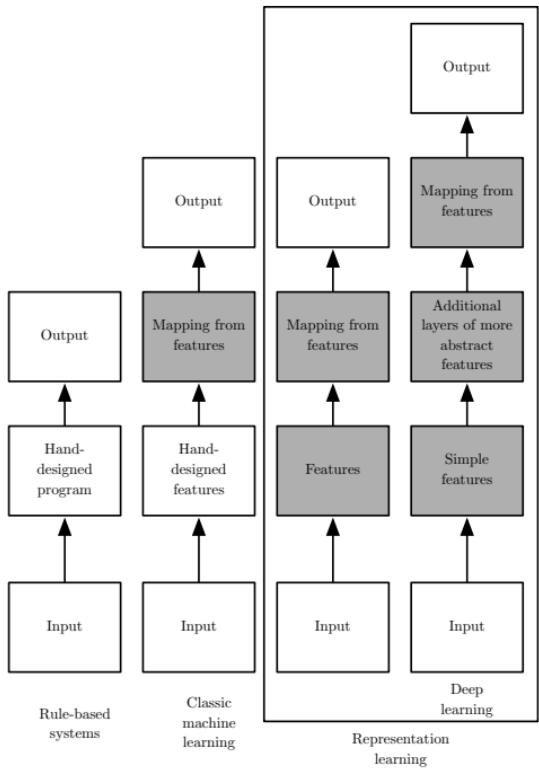

- Deep learning is part of a broader family of machine learning methods based on learning representations.
- An observation (e.g., an image) can be represented in many ways (e.g., a vector of pixels), but some representations make it easier to learn tasks of interest (e.g., is this the image of a human face?) from examples, and research in this area attempts to define what makes better representations and how to learn them.

# An Example

# An Example

Common among the various high-level descriptions of deep learning are two key aspects:

1. Models consisting of **multiple layers/stages** of **nonlinear information processing**
2. Methods for supervised or unsupervised learning of feature representation at successively higher, more abstract layers.

Deep learning is in the intersections among the research areas of

1. Neural networks
2. Artificial intelligence
3. Graphical modeling
4. Optimization
5. Pattern recognition
6. Signal processing.

## **Success stories**

---

## 1. Finding nearest images

- day + night =

- flying + sailing =

- bowl + box =

- box + bowl =

Nearest Images

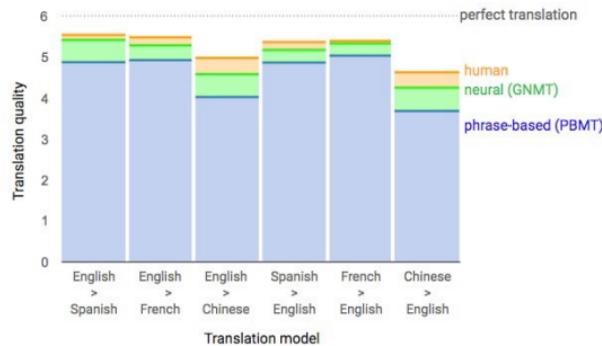

<sup>1</sup>This slide is taken from Prof. Ghodsi's slides.

## 1. Word2vec (Mikolov13).

king – man + woman = queen

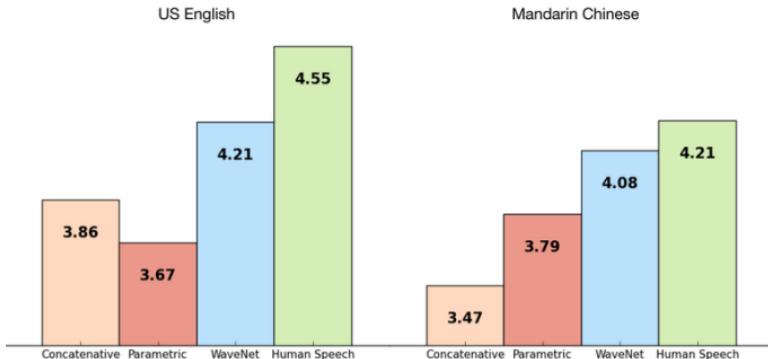

## 2. Google neural machine translation<sup>2</sup>

<sup>2</sup>Borrowed from <https://blog.statsbot.co/deep-learning-achievements-4c563e034257>

## 1. Wavenet : Generating voice <sup>3</sup>

## 2. Lip Reading

<sup>3</sup>Borrowed from <https://blog.statsbot.co/deep-learning-achievements-4c563e034257>

## 1. LeNet-5

LeNet-5 is designed for handwritten and machine-printed character recognition

Live demo : <http://yann.lecun.com/exdb/lenet/index.html>

## 2. Sentiment Trees

Predicting the sentiment of movie reviews.

Live demo : <http://nlp.stanford.edu:8080/sentiment/rntnDemo.html>

1. TD-Gammon
2. DQN in Atari
3. Deep RL in Robotics
4. Alpha Go and Alpha Zero
5. Dota2 (Video Game)

## **Outline of course**

---

1. Review of machine learning and history of deep learning
2. Multi-layer Perceptrons and Backpropagation (MLP)
3. Optimization and Regularization
4. Convolutional networks (CNN)
5. Recurrent networks (RNN)
6. Sum-Product networks (SPN)
7. Dual learning
8. Attention mechanism & Transformer family
9. Deep reinforcement learning (Deep RL)
10. Representation learning
11. Deep generative models
12. Graph convolutional networks (GCN)
13. Applications
  - Text mining and natural language processing
  - Computer vision
  - Social networks
14. Advanced topics
